

CALCULATION OLYMPIAD SPORT CATEGORY

· **Formula for coefficient calculation :**

$$\text{All categories except category Marathon} = \frac{\text{position in the result} \times 1.000}{\text{Number of basketed pigeons (max. 5000)}}$$

*Note : the pigeon which has got **the lowest points** is the first for the general prize list.
The coefficient will be calculated to three digits after the decimal point.*

$$\text{Marathon category} = \frac{\text{position in the result} \times 1.000}{\text{Number of basketed pigeons (without any limit)}}$$

*Note : the pigeon which has got **the lowest points** is the first for the general prize list.
The coefficient will be calculated to three digits after the decimal point.*
